

# Patchwork Houses and Buildings

Half day workshop – Flavin Glover

All skill levels

A workshop for the quilter who wishes to design a quilt inspired by buildings or architectural features. Through exploring ways to simplify and stylize, each participant will problem-solve building shapes and motifs into patchwork; develop a theme by accenting and/or reproducing architectural features; and begin drawing unique quilt designs. How to enlarge to-scale line drawings will be reviewed for those wishing to work with full-size patterns.

The quilts below are examples from the Color in Creative Patchwork Half Day Workshop and will be used to teach the patterns and techniques.

Rainbow City

Bayside

Tuscan Village

Around the Corner

Brownstones

Briarwood

Elevations

Chestnut Hill

**Student's Supply List:** Notepad and pencil, picture or drawing of buildings, house, or architectural features for inspiration. Instructor will provide colored pencils, worksheets, and grids.

**For the workshop I will need:** Table for digital projector (projector provided by instructor), extension cord with multiple outlets, screen or light-colored wall, name tags for students, bulletin or display board, display table.
